

Case Study :- Sloping Hill

Interclamp®
The right connection

Interclamps have been used on this sloping application by a local authority. With the ability of being able to be used on applications of between 0 to 11° the 154, 155 & 156 fittings have been used on this hill to prevent pedestrians from falling over the edge of the road. The Interclamp swivel range of fittings 167, 168, 173 etc can be used if greater angles need to be achieved.
