

## Case Study :- Three Section Multi-level Stairway

**Interclamp®**  
The right connection

This recent installation of Interclamps was carried out at one of the UK's leading leisure venues, where the problem for the installer was to ensure the safe and easy flow of several thousand people safely and in a filtered, controlled manner. The two tier external stairway was no problem for the Interclamp's versatile range the 167 and the 173 fittings offered the ability to cope with the gradient of the stairway easily.
